SKILLS

- **Languages:** Python, C++, SQL
- **Machine Learning & AI:** Data Preprocessing, Feature Engineering, Supervised & Unsupervised Learning, Computer Vision, Convolutional Neural Network (CNN), Transformers
- **Frameworks and Tools:** Scikit-learn, Pandas, NumPy, Hugging Face, TensorFlow, Git, GitHub
- **Databases & Cloud:** MySQL, DBMS, MongoDB, Vector Database
- **Generative AI:** Retrieval-Augmented Generation (RAG), LangChain, Large Language Model(LLM)
- **Backend Services:** Flask, RESTful APIs, Node.js
- **Core Concepts:** Data Structures & Algorithms, OOPS, Operating Systems (OS), Computer Networks (CN)
- **Soft Skills:** Problem-Solving, Team Collaboration, Adaptability

INTERNSHIP

AI Developer Intern | Bitlance Tech Hub Pvt. Ltd.

Oct 2025 – Present

- Pioneered and deployed multi-agent LLM systems using LangChain and n8n, automating business workflows and reducing manual effort by 40% through intelligent task orchestration and autonomous decision-making.
- Collaborated cross-functionally with product and business teams to integrate AI agents into production workflows, implementing real-time decision systems that improved automation efficiency by 30% and reduced response times.
- Established robust testing frameworks for AI model outputs and workflow reliability, incorporating edge-case validation, response quality metrics, and automated testing to achieve over 95% production reliability.

PROJECTS

Crop Guidance System | React.js, Firebase, Flask API, ML | [Link](#) | [GitHub](#)

Sep 2025 – Dec 2025

- Developed production-grade crop recommendation engine leveraging Random Forest and Decision Trees, achieving 89% prediction accuracy through ensemble modeling, hyperparameter optimization, and comprehensive data preprocessing pipeline.
- Built full-stack solution with Flask RESTful API backend and React.js frontend, incorporating Firebase authentication, user profiling, and real-time data visualization dashboards for users and decision-making insights.
- Implemented automated testing suite for API endpoints and model validation, ensuring data quality checks, error handling, and 99.5% uptime during beta testing with CI workflows.

Prep4Place | Next.js, TypeScript, Gemini API, Firebase, Vapi AI | [Link](#) | [GitHub](#)

Jun 2025 – Aug 2025

- Architected a comprehensive interview preparation platform featuring guided DSA practice sheets, an AI-powered resume builder, and real-time voice-based mock interviews using Vapi AI and Gemini LLM, scaling to 200+ active users.
- Engineered an intelligent resume builder with AI-driven content suggestions and ATS optimization, alongside structured DSA learning paths with curated problem sets, difficulty progression, and topic-wise categorization.
- Designed an AI interview system with real-time voice interactions, instant feedback generation, and a performance analytics dashboard tracking user progress, skill improvement metrics, and interview readiness scores.

CERTIFICATES

- Data Structures and Algorithms (72 hours) – [Iamneo](#) Dec 2024
- Object Oriented Programming (72 hours) – [Iamneo](#) Dec 2024
- Introduction to Hardware and Operating Systems - [Coursera](#) Sep 2024

ACHIEVEMENTS

- Solved over 350+ Data Structures and Algorithms problems on LeetCode, maintaining a solving streak of more than 51 days.
- Secured 11th rank in a national-level Web Development competition organized by CipherSchools.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.6** 2023-2027
- **A.W Faez E-Aam Inter College** Amroha, Uttar Pradesh
12th With Science – Percentage: 69.8 2021-2022
- **H.P Inter College** Amroha, Uttar Pradesh
10th With Science – Percentage: 69.7 2019-2020
